

Brief Curriculum Vitae

Dr. Katharina Kötting
Omya International AG, Switzerland

Dr. Katharina Kötting is the Director of Innovation and Technical Marketing Agriculture with Omya International in Switzerland. She is heading the innovation team which focuses on the development of products based on calcium carbonate, dolomite and other minerals for the agriculture crop and animal feed and health markets.

Katharina obtained a PhD in Plant Biochemistry from the ETH Zurich in Switzerland in 2012. She continued to work as a Postdoctoral Researcher at ETH, investigating how plants partition their resources between compounds for growth and storage.

In 2018 Katharina joined Omya as a Manager Innovation and Technical Marketing Agriculture & Forestry to develop mineral products improving soil health and crop nutrition with a major focus is on calcium nutrition. In 2018 she took over the lead of the innovation team and since the same year she is co-responsible of the Crop Science Center, Omya's research center for crop inputs comprising a greenhouse, semi-field and orchard areas.
