

Brief Curriculum Vitae

Prof Michael McLaughlin
Waite Campus of the University of Adelaide

Presentation Topic: Developing Novel Fertilizers to Optimise Crop Nutrition and Minimise Environmental Footprint

Mike McLaughlin is a Professor in the School of Agriculture Food and Wine, and Director of the Mosaic-sponsored University of Adelaide Fertiliser Technology Research Centre (<http://www.adelaide.edu.au/fertiliser/>).

Mike is a graduate of the University of Ulster in Northern Ireland, from the University of Reading (UK) and from the University of Adelaide.

Mike's research interests are principally in soil and fertilizer chemistry, the behaviour of nutrients and contaminants in soils and the improvement of fertiliser efficiency in agricultural systems.

He has published more than 400 papers in international scientific journals on soil chemistry, soil contamination, ecotoxicology, fertilizer chemistry and crop nutrition.
