

PROF JENNIFER FITCHETT

Climatological Aspects in Agriculture

Jennifer Fitchett is a Professor of Physical Geography at the University of the Witwatersrand. She holds a BSc from UCT, a BSc Honours and MSc from the University of the Witwatersrand, and completed her PhD registered split-site at the University of the Witwatersrand and University College London. Her research is in the field of biometeorology, exploring climate change and its impacts on plants, animals and people, and has published over 100 academic papers on these topics. She holds a rating from the National Research Foundation of South Africa, and was the 2024 recipient of the NSTF Communications Award.
